

Infant & Toddler

DEVELOPMENTAL CHECKLISTS

Just like tracking height and weight, tracking developmental milestones helps caregivers see how children's skills compare to typical growth and development.

Developmental milestones are skills most children can do by a certain age. There are important milestones children achieve at each stage of life.

Each child is an individual, so it is important to remember that a milestone checklist is only a guide for growth and development. Some children may achieve skills a little earlier and some children may achieve skills a little bit later; however, certain skills tend to develop within predictable age ranges.

Knowing what to look for is key to knowing how a child is developing. Developmental milestones can help caregivers become aware of what skills are expected at what ages and acknowledge what the child is accomplishing—a first smile, a first step, a first word.

HELPFUL HINTS TO USING MILESTONE CHECKLISTS:

- Child care providers and teachers work with many children, so watching children closely and recognizing
 certain skills will come naturally. Most milestones can be observed while the child is playing in a variety
 of activities and following daily routines throughout the day.
- If milestones do not occur naturally while observing the child, caregivers can engage the child with social interaction, toys, and demonstrations to try to elicit or bring out certain skills. Infants and toddlers may be most comfortable moving around and playing on the floor, while preschoolers may sometimes play at a table.
- Mark a check or date by a skill on the milestone checklist when the child is observed performing that skill. If the child needs assistance to complete the skill, do not check the skill on the milestone checklist; this means the child is still learning this skill.
- While some milestones (like language) can be observed anytime during the day, other milestones will
 most likely be observed during targeted times of the day. For example, motor skills will be easy to observe
 during movement activities, dancing, and in the yard/playground. Look for self-help skills during arrival,
 dismissal, toileting, and mealtimes. Social-emotional skills can be observed while children play or during
 centers.

The following milestone checklists can be used by parents and teachers of children from birth to 48 months of age. They are divided into age ranges and areas of development: Language, Social-Emotional, Cognitive, Early Literacy, Physical Health & Motor Development.

The checklists can also be downloaded at: cliengage.org/public/tools/assessment/infant-toddler-checklists/

0-3 months

DEVELOPMENTAL CHECKLIST

Child's Name:

Administrator's Name:

Date(s) of Administration:

Tip: If completing multiple times (e.g., once per month), use a different colored pen for each administration.

HEALTH & MOTOR

- $oldsymbol{\gimel}$ Stretches legs out and kicks when lying on stomach or back
- ☐ Raises head and chest up when lying on tummy
- ☐ Pushes down on legs when feet are on a hard surface
- ☐ Begins to make smoother movements with arms and legs by 3 months old
- Opens and shuts hands
- ☐ Brings hands to mouth
- ☐ Grasps with entire hand when finger or rattle is placed in palm
- ☐ Focuses on objects up close (6-12 inches away)
- ☐ Prefers to gaze at black-white contrast and human faces
- ☐ Tracks slow moving objects with eyes

SOCIAL-EMOTIONAL

- ☐ Likes to be held close and cuddled
- ☐ Turns head toward familiar voice
- ☐ Enjoys looking at faces
- ☐ Begins to smile and coo at people
- ☐ Enjoys playing with people and might cry when playing stops
- ☐ Cries when hungry, uncomfortable, tired, or unhappy
- ☐ Can briefly calm self by sucking on hand or pacifier
- ☐ Is comforted by voice, sight, smell, and touch of familiar caregiver

COGNITIVE

- ☐ By 3 months, spends more time awake and alert
- ☐ Tracks or follows objects with eyes
- ☐ Looks back and forth briefly from one object to another

LANGUAGE & LITERACY

- ☐ Startles at loud sounds
- Quiets or smiles when spoken to
- ☐ Starts to turns eyes or head toward sounds
- ☐ Cries; by 3 months will start to make different cries for different needs (hungry, tired)
- ☐ Makes pleasure sounds (coos and goos)
- Listens to and looks at a book for brief periods of time

RED FLAGS

Teachers should talk to parents or guardians if they notice one or more of these signs of possible developmental delay. Parents should discuss red flags with their pediatricians or call Early Childhood Intervention (ECI) to ask for a developmental screening.

- ☐ Doesn't respond to loud sounds
- Doesn't watch things as they move
- ☐ Doesn't smile at people
- ☐ Doesn't bring hands to mouth
- ☐ Can't hold head up when pushing up when on tummy

3-6 months

DEVELOPMENTAL CHECKLIST

Child's Name:

Administrator's Name:

Date(s) of Administration:

Tip: If completing multiple times (e.g., once per month), use a different colored pen for each administration.

HEALTH & MOTOR LANGUAGE & LITERACY

Holds head steady, unsupported	Responds to changes in tone of voice
Rolls from back to tummy and tummy to back	Begins to turn in response to name
Pushes up on forearms when lying on tummy	Responds to music and singing
Begins to sit with support	Laughs aloud
Pushes down on legs or bounces on feet when supported in a standing	Starts to babble with sounds like p, b, m
position	Vocalizes to get attention, express displeasure, show
Reaches, grasps and holds objects	eagerness
Uses both hands to explore toys and bring them to mouth	Produces raspberries, squeals, trills
Shakes and bangs objects	May start to imitate sounds s/he hears
Grasps and plays with feet while lying on back	Takes turns making sounds with others
Focuses eyes on small objects up close as well as objects a few feet away	Reaches toward and touches a book

□ By 5 months, develops good color vision
 □ Reaches for spoon while being fed
 □ May respond to caregiver's voice while reading by smiling and cooing

$\hfill \Box$ Begins to sleep for a longer period through the night

Teeth may begin to appear

Observes people and activities

SOCIAL-EMOTIONAL

Closes mouth firmly or turns head away when hunger is satisfied

Responds with eye gaze, smiling, and cooing when spoken to, picked up, or shown affection by a familiar caregiver
 Initiates social interactions with others by making eye contact and cooing
 Copies some facial expressions, like smiling or frowning
 Laughs aloud, squeals, blows bubbles
 Shows excitement by waving arms and legs
 Communicates distress verbally (fusses, cries) and nonverbally (turns head, frowns, arches back, spits up)
 Stops crying when a familiar caregiver comes near
 Responds to other people's emotions

COGNITIVE

- Looks around and shows curiosity about things nearby in environment
 Reaches for objects
 Begins to explore objects (e.g., banging, putting in mouth)
- make noise)

 Begins to act bored or fuss if activity does not change

☐ Begins to experiment with cause and effect (e.g., shaking a rattle to

☐ Forgets about object when removed from view

RED FLAGS

Teachers should talk to parents or guardians if they notice one or more of these signs of possible developmental delay. Parents should discuss red flags with their pediatricians or call Early Childhood Intervention (ECI) to ask for a developmental screening.

- ☐ Has trouble moving one or both eyes in all directions by 4 months
- ☐ Can't hold head steady by 4 months
- ☐ Doesn't coo or make sounds by 4 months
- Doesn't push down with legs when feet are placed on a hard surface by 4 months
- Doesn't try to get things that are in reach
- ☐ Shows no affection for caregivers
- Doesn't respond to sounds around him
- ☐ Has difficulty getting things to mouth
- Doesn't make vowel sounds ("ah", "eh", "oh")
- ☐ Doesn't roll over in either direction
- ☐ Doesn't laugh or make squealing sounds
- ☐ Seems very stiff, with tight muscles
- ☐ Seems very floppy, like a rag doll

6-9 months

DEVELOPMENTAL CHECKLIST

Child's Name:

Administrator's Name:

Date(s) of Administration:

Tip: If completing multiple times (e.g., once per month), use a different colored pen for each administration.

HEALTH & MOTOR

- ☐ Crawls on hands and knees
- ☐ Can get into sitting position by self
- ☐ Sits without support
- ☐ Holds one thing in each hand at the same time
- ☐ Transfers object from one hand to the other hand
- ☐ Picks up small objects using pincer grasp
- ☐ May drool and enjoy chewing toys during teething
- ☐ Holds own bottle
- ☐ Places pacifier in own mouth
- ☐ May begin sleeping through the night

SOCIAL-EMOTIONAL

- ☐ Looks back and forth between toy and adult while playing
- ☐ Reaches out to touch another person
- ☐ Responds differently to caregiver and strangers, may become clingy with familiar adults
- ☐ Turns and looks when name is called
- ☐ Recognizes self in mirror
- ☐ Expresses distinct emotions, such as fear, sadness, anger, excitement
- ☐ Seeks reassurance from caregivers, for example starts to crawl and often "checks back" with caregiver

COGNITIVE

- ☐ Explores objects by visually inspecting them, turning them around, feeling all surfaces, shaking, and dropping them
- ☐ Begins to repeat actions to get an effect
- ☐ Searches for partially hidden objects

LANGUAGE & LITERACY

- ☐ Watches your face when you talk
- ☐ Understands 3 to 50 words
- ☐ Recognizes the sight of spoon, bottle
- ☐ Starts to recognize names of family members
- ☐ Understands "hi" and "bye"
- ☐ Starts to understand "no"
- Babbles using repeated syllables of alternating consonants and vowels (e.g., "bababa," "gagaga")
- ☐ Babbles with inflection and rhythmic patterns
- ☐ May start to clap hands and bang purposefully to make noise
- ☐ Recognizes familiar objects in pictures
- ☐ Especially likes pictures of faces
- Vocalizes and pats pictures
- Explores a book by feeling it, turning it upside down, putting it in mouth, dropping it, or throwing it

RED FLAGS

Teachers should talk to parents or guardians if they notice one or more of these signs of possible developmental delay. Parents should discuss red flags with their pediatricians or call Early Childhood Intervention (ECI) to ask for a developmental screening.

- ☐ Doesn't bear weight on legs with support
- ☐ Doesn't sit with help
- ☐ Doesn't babble ("mama," "baba," "dada")
- Doesn't play any games involving back-and-forth play
- ☐ Doesn't respond to own name
- Doesn't seem to recognize familiar people
- ☐ Doesn't look where you point
- ☐ Doesn't transfer toys from one hand to the other

☐ Doesn't crawl

☐ Can't stand when supported

Doesn't search for things that she sees you hideDoesn't say single words like "mama" or "dada"

Date(s) of Administration:

Tip: If completing multiple times (e.g., once per month), use a different colored pen for each administration.

HEALTH & MOTOR LANGUAGE & LITERACY

]	Runs easily		Understands "big" and "little"
J	Jumps in place		Likes to hear same story repeated
J	Rolls, pounds, squeezes, pulls playdough		Follows instructions with 2 steps
J	May start to hold a crayon between thumb and fingers		Understands words like "in," "on," and "under"
	Scribbling becomes more varied to include vertical lines,		Begins to understand "what" and "where" questions
	horizontal lines, and circles		Understands simple questions dealing with his/her
	Learns to turn paper pages, may turn 2 to 3 pages at a time	_	environment and activities
	Completes simple puzzles		Identifies objects by function (e.g., "Show me what we eat with")
	Stacks a tower of blocks		Names body parts
	Strings large beads together		Can say between 200 and 900 words
J	Turns a doorknob		Uses short sentences
	Screws/unscrews a lid		Asks questions like "What's that?" or "Where's my?"
	Undresses by self, unzips zippers, and takes off shoes		Uses quantitative words (e.g., "some," "one," "more")
J	Shows signs of readiness for toilet training (e.g., stays dry for		Says first name, age, and sex
	longer periods of time)		Says words like "I," "me," "we," and "you" and some plurals
	Washes and dries hands	_	(cars, dogs, cats)
	Begins to brush teeth with adult assistance		Carries on a conversation using 2 to 3 sentences
	Enjoys helping with simple household chores (e.g. wiping the table, feeding a pet)		May carry on pretend conversation between self and dolls/ stuffed animals
7	Tells where it hurts when in pain		Uses two-word negative phrases, such as "no want"
	r r r r		Talks to other children as well as adults
	SOCIAL EMOTIONIAL		Speech is understood by most listeners most of the time
	SOCIAL-EMOTIONAL		Loves reading the same book again and again
_	Says "please" and "thank you" when reminded		Holds book right side up
_	Shows interest in other children and enjoys being around		Learns to turn paper pages, may turn 2 to 3 pages at a time
_	them, even if not playing together yet		Searches for favorite picture or page
]	May show preference for certain children, show affection for		Tells about pictures in own words
_	friends		Repeats some of the words or phrases in a story
]	Participates in simple group activity or group game like chase		Fills in words or completes the end of sentences/rhymes in familiar stories
]	Begins to take turns with assistance		Pretends to read books aloud to self
]	Recognizes some emotions in self and others; begins to name feelings		Begins to recognize some frequently seen signs and symbols (e.g., stop sign or fast food logo)
J	Takes pride in own accomplishments by smiling, clapping, cheering for self, or saying "I did it!"		Scribbling becomes more varied to include vertical lines, horizontal lines, and circles
J	May have increased temper tantrums, physical aggression, or		May start to hold a crayon between thumb and fingers
	rapid mood shifts		May verbally describe own drawings or "writing"
			ina, verban, describe own drawings or writing

24–36 months, continued.

COGNITIVE
Knows where things usually belong Uses a chair or stool to reach an object Completes simple puzzles Strings steps of pretend play together in a sequence (e.g., making crying noise to indicate doll is sad, preparing food for doll, feeding it, and putting it to bed) By 36 months, begins to pretend play a greater variety of events (e.g., visiting the doctor, going to the zoo, birthday party)
Red FLAGS Teachers should talk to parents or guardians if they notice one or more of these signs of possible developmental delay. Parents should discuss red flags with their pediatricians or call Early Childhood Intervention (ECI) to ask for a developmental screening. Falls down a lot or has trouble with stairs Drools or has very unclear speech Can't work simple toys (such as peg boards, simple puzzles, turning handle) Doesn't speak in sentences Doesn't understand simple instructions Doesn't play pretend or make-believe Doesn't want to play with other children or with toys Doesn't make eye contact Loses skills he once had

the baby.")

36–48 months

DEVELOPMENTAL CHECKLIST

Child's Name:

Administrator's Name:

Date(s) of Administration:

Tip: If completing multiple times (e.g., once per month), use a different colored pen for each administration.

HEALTH & MOTOR SOCIAL-EMOTIONAL ☐ Catches a big ball with arms extended ☐ Can follow familiar daily routines at home and school ☐ Pushes, pulls, steers wagon or wheeled toys Begins to notice differences and similarities in people (e.g., ☐ Walks up and down stairs with alternating feet skin color, hair color, abilities) ☐ Can name a friend ☐ Jumps off low step ☐ Stands on one foot for a few seconds ☐ Initiates or joins in cooperative play with other children Climbs ladder and uses slide Joins in group games with simple rules ☐ Pedals a tricycle Begins to negotiate solutions to conflicts or might accept compromise offered by an adult ☐ Does finger plays while singing songs Shares toys and takes turns, with assistance ☐ Forms simple shapes out of playdough (e.g. balls, snakes) Expresses a wider range of emotions (e.g., embarrassed, bored, ☐ Colors pictures, may color outside the lines brave, grateful) Copies a circle and a cross Develops specific fears (e.g., monsters, the dark, certain ☐ Begins to draw recognizable forms animals, costumed characters) ☐ Begins to show a preference for being right-handed or left-handed Begins to develop patience (is able to briefly wait without ☐ Builds 3-dimensional structures with blocks becoming upset) with assistance ☐ Snips with scissors Expresses emotions through words in addition to actions and ☐ Blows nose when reminded body language Dresses self with some assistance ☐ Begins to manage emotions by asking for help or using ☐ Unbuttons large buttons conscious self-soothing strategies (e.g., deep breaths to calm ☐ Uses toilet independently during daytime down, self-talk) with assistance Pours liquid from small pitcher with supervision Spreads with a butter knife with supervision ☐ Can recite familiar safety rules **COGNITIVE** ☐ Identifies basic colors and shapes Sorts objects using one or two features into categories (e.g., all large red cars together) ☐ Copies simple patterns Begins to count ☐ Begins to understand concepts of volume (e.g., empty, half, large, small, etc.) Some understanding of time (e.g., last night, tomorrow, yesterday, summer) Recognizes familiar driving routes and locations in neighborhood (e.g., says, "That's where Grandma lives!" when approaching her house) Better able to ignore distractions and focus on the task at hand, may persist in completing something that is a bit difficult

Experiments with different objects during play to compare their effects (e.g., cars on ramps to see which goes faster)

Organizes and plans what to pretend, such as roles, scenarios, and dialogue (e.g., "Let's play baking! I'll be the mommy and you be

Repeats actions to improve results (e.g., blowing bubbles or pumping legs on swing)

36-48 months, continued.

LANGUAGE & LITERACY

Understands up to 1,500 words by age 4
Can group objects according to category
Can follow commands with modifiers (e.g.,
"Walk slowly to the car")
Understands names of different kinds of animals
Understands four different prepositions
Understands one or more colors
Understands concepts such as "longer" (vs. "shorter") and "larger"(vs. "smaller") when the contrast is presented
Follows simple instructions even when stimulus objects are not present (e.g., "Go to the kitchen and get your shoes")
Beginning to understand time concepts (last night, tomorrow, yesterday, summer)
Can tell a story and relate events and experiences.
Uses sentences of 4 to 5 words
Says 1,000 words
Answers simple who, what, where, why questions
Sings a song or says a poem from memory such as the "Itsy Bitsy Spider" or the "Wheels on the Bus"
Can say first and last name when asked
Speech is 90% intelligible with context
Uses language for imaginative play
Asks questions, makes requests,
Can repeat words with four syllables
Has most vowels and diphthongs and consonants p, b, m, w, n well established
Names at least one or more colors correctly
Turns pages one at a time and from left to right
Sits still for longer stories read aloud
Retells a familiar story in own words
Begins to recognize some letters and numbers
May spontaneously rhyme or detect rhymes
Pretends to read to a caregiver, dolls, or stuffed animals
Relates a story to personal experiences
Begins to draw recognizable forms
Can copy a circle and a cross
Understands that writing is used for communicating ideas and information
Makes symbols or squiggles that resemble writing
Begins to copy some capital letters
May switch direction while writing and rotate the orientation of the paper
Can dictate story or letter to be written down

☐ May express interest in typing on electronic devices

RED FLAGS

Teachers should talk to parents or guardians if they notice one or more of these signs of possible developmental delay. Parents should discuss red flags with their pediatricians or call Early Childhood Intervention (ECI) to ask for a developmental screening.

□ Can't jump in place
 □ Has trouble scribbling
 □ Shows no interest in interactive games or make-believe
 □ Ignores other children or doesn't respond to people outside the family
 □ Resists dressing, sleeping, and using the toilet
 □ Can't retell a favorite story
 □ Doesn't understand "same" and "different"
 □ Doesn't use "me" and "you" correctly

☐ Speech cannot be understood by those outside

☐ Loses skills he once had

the family
